Dear Parent or Guardian,

In the coming weeks, staff from our center will be visiting your child's class to run an exciting new research study investigating how children think about math and quantities!

In our studies, children will do some math activities and games that take about 45 minutes to an hour and will take place on the premises of Cedar Hill Preparatory School. We will coordinate with program staff about scheduling testing sessions during the school day with individual children whose parents have provided permission. These activities involve paper/pencil and computer math and number games. For example, looking at pictures of quantities or symbolic numbers and deciding which is more, making decisions based on quantitative information, or explaining how they think about different concepts. We will record your child's responses to the questions using paper or a computer. If you provide permission, we will also video record your child's session. After participating, your child will receive a small sticker or toy as a thank you. All records will be kept confidential and participation is entirely voluntary. Many children enjoy participating in these activities, but if your child is not interested or wants to end the study early, we will end the study.

If you are interested in having your child participate, please complete the permission form at the link below or by using the QR code with your phone's camera by 11/14/2025. You can also find more information about the study and your rights as a research participant in the online permission form.

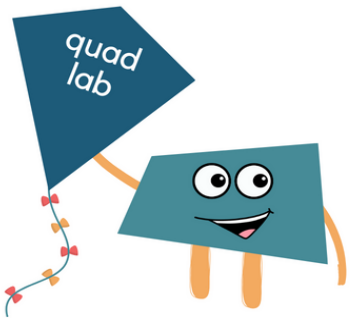

If you have any questions, please do not hesitate to contact. We would be happy to speak to you further about the research project!

Access the permission form here: tinyurl.com/mn-permission-form

Or by following the QR code with your phone's camera:

Sincerely,

Michelle Hurst, Ph.D.
Principal Investigator
